

Wood Casement Window

Cutting down a current primed casement sash to fit pre 1988 frame

Note: Corner screws must be removed from the sash prior to cutting and re-installation.

DO NOT modify Height.

E.I. Current 19" glass width unit overall sash width = $21\frac{15}{16}"$
 after $1/4"$ cut down per side = $21\frac{7}{16}"$
